## A HORRIBLE OBJECT.

An El Paso Chinaman Rotting With Asiatic Leprosy.

El Paso, August 29.—There is a case of genuine Asiatic leprosy in El Paso. It has been carefully hidden, and only yesterday came to light. The victim is a Chinaman, who lives in an adobe on the northwest corner of San Antonio and Utah streets, and has lain there under cover for nobody knows how long, while the dread disease was developing. Yesterday he ventured out upon the streets, where his horrible condition at once attracted attention. He is tall and gaunt, and was tottering with uncertain footsteps, and he seemed each instant about to swoon. The loathsome disease had reached that stage where the flesh loses its vitality, scales and sloughs off. The fact that the disintegrating process had commenced on the neck assured the early death of the victim, which will be, all things considered, a blessing to him. The mark of the disease was also visible upon his hands, which were contracted and drawn as though paralyzed; the fingers seemed perfectly rigid and the joints somewhat enlarged. So complete is the mortification that fire can be touched to the flesh without the slightest pain. The leper passed up San Antonio street and disappeared in one of the opium joints.

The New Store.—Mr. W. M. Havenor, who has been to the Bay purchasing a stock of goods for his store, returned yesterday. The stock he purchased is of the best quality, and a general assortment of the best family groceries will be constantly kept on hand. His store, for the present, will be on Commercial Row, near the Masonic Hall, and will be conveniently fitted up. Mr. Havenor is well known by the citizens of Reno, and is deserving of his full share of public patronage. His prices will be in keeping with the quality of his goods, and full weight always guaranteed. He will be ready for business in a few days, and will be pleased to have our people call and inspect his goods.

FOR THE FAIR.—About a ton of mineral specimens from Nevada county mines was shipped Tuesday to the Mechanics Institute at San Francisco for exhibition at the coming Fair, and another shipment of a similar character and extent will be made to-day. Inquiries for Nevada county fruit lands continue to come pouring in from all parts of the State and the East. Values of fruit lands are daily increasing, although they are yet astonishingly low as compared with those of equal quality and accessibility elsewhere. For one tract of nearly 600 acres, just north of Nevada City, 100 per cent. advance on the cost six months ago was refused Tuesday. Most of the numerous sales being effected are to actual settlers.

MINERAL HILL EXCITED.—The Eureka Sentinel of last Tuesday says: "John McDermott, who has been prospecting near Mineral Hill, writes to J. L. Thompson, a resident of that place, who is visiting at Eureka, and says that Mr. Flemming and he have been out in the hills, and found the best thing that has been discovered since the first location at that place; that everybody has gone to see it and got excited over it."

RUN OVER.—Thursday night, about twelve o'clock, when the east bound overland was coming through the mountain; a squaw, who was riding on the platform of one of the cars, fell off, and had her arms and one leg cut off. The passengers in the sleepers were awakened by the commotion, but full particulars of the accident could not be obtained.

EAGLE STUFFING.—The Walker Lake Bulletin says: The loose earth from the Eagle, which Daley and Hammond washed out at the Mount Cory mill, yielded between \$30 and \$40 a ton. As there is plenty more of the same kind of dust on the claim, they will probably have another washing day in a short time.

BEAR KILLED.—A few days ago there was another bear killed at Webber lake, making in all, six that have been shot in the last three or four weeks. They say they are very numerous in the mountains this season, and much bolder than ever before.

## PITTSBURG MINING DISTRICT.

## A Description of This Promising Mineral Field.

The Pittsburg Mining District is now attracting considerable attention and promises to become a heavy bullion producer. This mineral belt is in Lander county about 10 miles south of Battle Mountain. The field was discovered in '85, but no effort was made to develop it until the Spring of '86. Mr. W. S. Wilson, now of Reno, was the discoverer of the Marysville group of mines and early in the Spring of '86 commenced the work of development. The ledge upon which work has been prosecuted is strong and well defined, and can be traced for a long distance and though it varies, as do all veins, in width, it occasionally opens out into large ore chambers from which large quantities of ore can be extracted at light cost. The ore was found in the grass roots and has more than paid for all the improvements that have been placed on the property and they are now in a position to take out sufficient ore to run reduction works. In an interview with a JOURNAL reporter Mr. Wilson stated that he was more than satisfied with the outlook and was certain that development would show up a valuable mineral field. The Marysville group proper are on the same ledge, known as the Yreka, while two other locations belonging to the group are on an independent ledge. The Marysville group are designated as the Eureka, Yreka, Silver Medal, Gold Medal and Nancy Artimissi. So far all the work of any importance has been done on the Yreka and they now have three tunnels in the mountain all of which have been driven on the vein. The longest tunnel is 225 feet and the face of the drift is 110 feet from the surface giving them an extensive area of stopping ground. In this level a winze is being sent down that has now reached a depth of 25 feet and shows a decided improvement in the grade of the ore, demonstrating that the ore of the ore body is deeper in the ground. All the rock taken from this portion of the mine is sent to Reno for reduction and the returns are entirely satisfactory. The upper tunnel is in 125 feet and like the longer one shows good shipping ore for the entire length. Air connections with the surface have been run in both levels and the mine thereby well ventilated and work can be forwarded without any inconvenience. The ore is sorted into three classes; the first and second grade is shipped for reduction and the third class is stored at the mine. The first class ore will average about \$250 per ton in silver and gold, and the second class, termed the low grade shipping ore, averages about \$60 per ton. The showing in the mine is sufficient to justify the erection of reduction works and Mr. Wilson says that he is confident that he could keep a mill in constant operation though he does not contemplate the erection of reduction works until he has more fully prospected the property. If the ledge unfolds well when greater depth is attained he will then proceed to place a mill at some available point where reliable water power can be obtained. The character of the ore is black sulphuret and ruby, the latter predominating. Occasionally a hard chloride in the form of horn silver makes its appearance and native silver is also found. Choice selections will assay as high as \$10,000 per ton but this of course does not exist in large quantities, but sufficient high grade ore is encountered to favor a large quantity of lower grade, and transforms it into fine milling ore. Mr. Wilson thinks however that concentrators would work admirably and that, if so, a great saving could be made in the transportation of ore for reduction. Heretofore he has shipped his product to Salt Lake and Denver, but hereafter, if the Reno Reduction Works can work the ore without unnecessary delay, he will ship here altogether.

## NEVADA'S SOIL.

## Its Adaptability for Producing Corn and Wine.

The Virginia Chronicle truly says: Corn grown on ranches along the Carson river is just now in season for table use. It is far superior to the article brought here from California. The ears are as large and as well filled and the grain equally as firm as that of corn raised in Illinois and other States east of the Rocky Mountains famed for that species of cereal products. The Italian owners of the ranch north of Sixmile canyon road, known as the French gardens, are growing luscious grapes on the southern slopes of the hills in the vicinity, the red lava soil of that locality proving peculiarly adapted to the growth of vines, producing a wine grape equal to those grown on the banks of the historic Rhine, silver Rhone or blue Danube.

The soil on the southern slopes of the hills marking the northern boundary of the desert east of the city is precisely similar in character to that in the vicinity of the French gardens, with the advantage that the altitude is several hundred feet lower than at the gardens and the temperature therefore several degrees warmer, snow rarely ever lying there more than 54 hours after a fall.

## A BIG PROFIT.—The Carson Appeal has this:

Senator Williams, Jacob Klein and W. D. Tobey returned from San Bernardino, Monday morning, with considerable more money in their pockets than they had when they left Carson. About three years ago these gentlemen and Mr. T. R. Hofer joined a syndicate, known as the Banning Land & Water Company, of Banning, San Bernardino county. They held the largest interest in the company. With the boom in Southern California, the property of the Banning Land & Water Company boomed. For some time an Eastern syndicate has been negotiating for this land and to effect the sale was what called our townsmen to San Bernardino. The property was sold for \$250,000. Just how much the four gentlemen above named made on the transaction could not be learned, but one of them informed an Appeal reporter that they more than doubled on the money they invested. They are to be congratulated on their good fortune.

STANDARD WORKS.—Mr. W. J. Harley, representing P. F. Collier, publisher of New York, is in Reno taking orders for Shakespeare's works in eight volumes, Waverley Novels, 9 vols., Dickens's, 6 vols., Milton's "Paradise Lost," Dante's "Inferno," plus albums and Bibles. The public have every advantage of getting any of these works delivered complete on payment of \$2, the balance of payments to be collected at \$1 per month. The gentleman is stopping at the Golden Eagle.

## ADVICE TO MOTHERS.

Are you disturbed at night and broken of your rest by a sick child suffering and crying with pain of cutting teeth? If so, send at once and get a bottle of Mrs. Winslow's Soothing Syrup for Children Teething. Its value is incalculable. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures dysentery and diarrhoea, regulates the stomach and bowels, cures wind colic, softens the gums, reduces inflammation, and gives tone and energy to the whole system. Mrs. Winslow's Soothing Syrup for Children Teething is pleasant to the taste, and is the prescription of one of the oldest and best female nurses and physicians in the United States, and is for sale by all druggists throughout the world. Price 25 cents a bottle. Feb. 21-law f. 1-v

employees. Mr. Wilson built the wagon road from the mine to the railroad at a cost of about \$2,000. In conclusion, Mr. Wilson, who is an old timer, and has grown gray in the mining fields of the West, said, "I am now confident that the district has a prosperous future and that the property in which I am interested in connection with my sons will turn out well. I have worked hard to find a mine that would suit my fancy, and am now satisfied that I have found it, and can quietly settle down and work it. I have brought my family to Reno where I can give my children educational advantages and look after the reduction of my ore."
